## Chemistry Level II Contents

### ***Chapter 1: Matter, Mass, and Moles***

#### **1.1 Introduction**

- 1.1.1 Chemistry happens everyday
- 1.1.2 What is chemistry?
- 1.1.3 Where did we get chemistry?

#### **1.2 Atoms**

- 1.2.1 Protons, neutrons, and electrons
- 1.2.2 Matter and mass
- 1.2.3 Atomic mass and atomic weight
- 1.2.4 Moles: counting and weighing atoms

#### **1.3 The Periodic Table**

- 1.3.1 Introduction
- 1.3.2 The elements
- 1.3.3 Mixtures and pure substances
- 1.3.4 Where did we get the Periodic Table?
- 1.3.5 The Periodic Table today

#### **1.4 Summary**

#### **1.5 Study Questions**

### ***Chapter 2: Chemical Bonding***

#### **Chemical Bonding – Part A**

#### **2.1 Forming Bonds**

- 2.1.1 Introduction
- 2.1.2 Chemical bonding: basic picture

#### **2.2 Atomic Orbitals**

- 2.2.1 *s* orbitals
- 2.2.2 *p* orbitals
- 2.2.3 *d* orbitals
- 2.2.4 Subshells

#### **2.3 Filling Orbitals**

- 2.3.1 The Pauli principle
- 2.3.2 The Aufbau principle
- 2.3.3 Electron configuration of the elements

#### **2.4 The Periodic Table**

- 2.4.1 Noble gases: all subshells filled
- 2.4.2 Alkali metals: one extra electron

- 2.4.3 Halogens: one missing electron
- 2.5 Summary – Part A**
- 2.6 Study Questions – Part A**

## **Chemical Bonding – Part B**

### **2.7 Molecular Bonding**

- 2.7.1 Introduction
- 2.7.2 Core and valence electrons

### **2.8 Ionic Bonding**

- 2.8.1 Ions
- 2.8.2 Ionic compounds
- 2.8.3 Alkali earth metals
- 2.8.4 Hydrogen ions
- 2.8.5 Ionic compounds often dissolve in water

### **2.9 Covalent Bonding**

- 2.9.1  $\sigma$  bonding
- 2.9.2  $\pi$  bonding

### **2.10 Hybrid Orbitals**

- 2.10.1 sp hybrid orbitals
- 2.10.2  $sp^2$  hybrid orbitals
- 2.10.3  $sp^3$  hybrid orbitals

### **2.11 Summary – Part B**

### **2.12 Study Questions**

## **Chapter 3: Chemical Reactions**

### **3.1 Chemical reactions**

- 3.1.1 Introduction
- 3.1.2 Reactants and products
- 3.1.3 Chemical formulas
- 3.1.4 Stoichiometry
- 3.1.5 Balancing chemical equations
- 3.1.6 Using the stoichiometric coefficient

### **3.2 Using Chemical Equations**

- 3.2.1 Calculating mass
- 3.2.2 Combination reaction
- 3.2.3 Decomposition reaction
- 3.2.4 Displacement reaction
- 3.2.5 Exchange reaction

### **3.3 Summary**

### **3.4 Study Questions**

## **Chapter 4: Acids, Bases, and pH**

### **4.1 Acid-Base Reactions**

- 4.1.1 Introduction

- 4.1.2 Acids, bases, and salts
- 4.2 Acids and Bases**
  - 4.2.1 Arrhenius model
  - 4.2.2 Monoprotic acids
  - 4.2.3 Polyprotic acids
  - 4.2.4 Arrhenius bases
- 4.3 Concentration**
  - 4.3.1 Concentrated and dilute solutions
  - 4.3.2 Molarity
- 4.4 Strength of Acids and Bases**
  - 4.4.1 pH
  - 4.4.2 Strong and weak acids and bases
- 4.5 Summary**
- 4.6 Study Questions**

## ***Chapter 5: Acid-Base Reactions***

- 5.1 Acid-Base Reaction**
  - 5.1.1 Introduction
  - 5.1.2 Neutralization reactions
- 5.2 Titrations**
  - 5.2.1 Introduction
  - 5.2.2 Strong acid titrated with a strong base
  - 5.2.3 Graphing titrations
  - 5.2.4 Titrations of weak acids with strong bases
  - 5.2.5 Titrations of strong acids with weak bases
  - 5.2.6 Titrations of polyprotic acids
- 5.3 Summary**
- 5.4 Study Questions**

## ***Chapter 6: Mixtures***

- 6.1 Introductions**
  - 6.1.1 What is a mixture?
  - 6.1.2 Mixture of mixtures
- 6.2 Types of Mixtures**
  - 6.2.1 Homogeneous and heterogeneous
  - 6.2.2 Solutions and colloids
- 6.3 Solubility of Solutions**
  - 6.3.1 Introduction
  - 6.3.2 Solubility and polarity
  - 6.3.3 Polarity and electronegativity
  - 6.3.4 Polarity and shape
  - 6.3.5 Like dissolves like
  - 6.3.6 Solubility and temperature
- 6.4 Surfactants**

- 6.4.1 Introductions
- 6.4.2 Soaps
- 6.4.3 Biological membranes

## **6.5 Summary**

## **6.6 Study Questions**

# ***Chapter 7: Separating Mixture***

## **7.1 Principles of Separation**

- 7.1.1 Introduction
- 7.1.2 Types of mixtures
- 7.1.3 Properties of mixtures

## **7.2 Techniques of Separation**

- 7.2.1 Filtration
- 7.2.2 Evaporation
- 7.2.3 Distillation
- 7.2.4 Recrystallization
- 7.2.5 Extraction
- 7.2.6 Chromatography

## **7.3 Summary**

## **7.4 Study Questions**

# ***Chapter 8: The Chemistry of Carbon***

## **The Chemistry of Carbon – Part A**

### **8.1 Organic Chemistry**

- 8.1.1 Introduction
- 8.1.2 Isomers, functional groups, and parent molecules
- 8.1.3 Classes of organic molecules

### **8.2 Hydrocarbons: Alkanes, Alkenes, Alkynes, and Aromatics**

- 8.2.1 Alkanes
- 8.2.2 Alkenes and Alkynes
- 8.2.3 Reactions of alkenes and alkynes
- 8.2.4 Functional groups make synthesis possible
- 8.2.5 Aromatics

### **8.3 Alcohols, Amines, Aldehydes, Acids, Ketones, Esters, and Amides**

- 8.3.1 Alcohols and amines
- 8.3.2 Aldehydes, acids, and ketones
- 8.3.3 Esters and amides

## **8.4 Summary – Part A**

## **8.5 Study Questions – Part A**

## **The Chemistry of Carbon – Part B**

### **8.4 Biochemistry**

- 8.4.1 Introduction

8.4.2 Nutrients in food

## **8.5 Minerals**

8.5.1 Introduction

8.5.2 Sources

## **8.6 Vitamins**

8.6.1 Introduction

8.6.2 Sources

## **8.7 Carbohydrates**

8.7.1 Introduction

8.7.2 Monosaccharides and oligosaccharides

8.7.3 Polysaccharides

## **8.8 Fats and Lipids**

## **8.9 Steroids**

## **8.10 Summary**

## **8.11 Study Questions**

# ***Chapter 9: Polymers***

## **9.1 Polymers**

9.1.1 Introduction

9.1.2 Polymer uses

## **9.2 Polymer Structure**

9.2.1 Monomers

9.2.2 Linear or branched

9.2.3 Crosslinks

## **9.3 Polymer Properties and Reactions**

9.3.1 Polymer structure

9.3.2 Polymer addition reactions

9.3.3 Termination, branching, crosslinking

9.3.4 Polyethylene is all around you

9.3.5 Other addition polymers

9.3.6 Forming polymers by condensation reactions

## **9.4 Summary**

## **9.5 Study Questions**

# ***Chapter 10: Biological Polymers***

## **10.1 Introduction**

10.1.1 Polymers in living things

10.1.2 Living cells are like tiny computers

10.1.3 Biological machinery

## **10.2 Amino Acid Polymers: Proteins**

10.2.1 Amino Acids

10.2.2 Peptide bonds

10.2.3 Protein primary structure

10.2.4 Protein secondary structure

- 10.2.5 Protein tertiary structure
- 10.2.6 Protein quaternary structure
- 10.3 Nucleic Acid Polymers**
  - 10.3.1 DNA
  - 10.3.2 Genetic words and the sequence of DNA
  - 10.3.3 Hydrogen bonds and molecular recognition
  - 10.3.4 The double helix
- 10.4 RNA**
- 10.5 Building Biological Machines**
- 10.6 Summary**
- 10.7 Study Questions**

***Appendix A: Building molecules using covalent bonds***

***Appendix B: Structural and empirical formulas***

***Appendix C: pH***

***Appendix D: Dimensional analysis***

***Appendix E: Amino acid "R" groups***

***Appendix F: Amino acid codons (RNA)***

***Appendix G: Atomic radii***

***Appendix H: Ionic radii***

***Glossary – Index***
