## **Headline: Top 10 Darwin and Design Resources for 2009**

Colorado Springs, CO – February 18, 2010

“I would never have predicted that an atheist would name a book about intelligent design as one of the top books of 2009, while another atheist would write a book defending intelligent design?” commented Dennis Wagner, ARN Executive Director, about the organization’s Top Ten Darwin and Design Resource List for 2009. “This is a sign that open minds in the academic and scientific communities are beginning to take the evidence for intelligent design seriously,” Wagner concluded. He was referring to the number one book on the list, [\*Signature in the Cell: DNA and the Evidence for Intelligent Design\*](#) by Stephen Meyer and number three book [\*Seeking God in Science: An Atheist Defends Intelligent Design\*](#) by Bradley Monton.

Kevin Wirth, ARN Director of Media Relations, pointed out that several other resources on the 2009 list show a growing international interest in intelligent design: “Hungarian scientists published an English version of their book, [\*Nature’s IQ\*](#), that documents over 100 irreducibly complex behaviors in nature, while a well-published British medical doctor documented his reservations about Darwinian evolution in the book [\*Why Us: How Science Rediscovered the Mystery of Ourselves\*](#).”

An online version of the ARN Top 10 Darwin and Design stories for 2009 with hyperlinks to original news sources can be found at [www.arn.org/top10](http://www.arn.org/top10).
